# **RIANDRY** CONNOR

# **FULLSTACK DEVELOPER**

#### **PERFIL**

Versatile and detail-oriented software engineer with experience in full-stack development, skilled in designing and implementing scalable web applications. Proficient in front-end frameworks and back-end technologies, with experience in RESTful APIs, cloud services, and DevOps. Known for collaborative problem-solving, optimized code quality, and delivering user-centric solutions that improve application performance and user experience.

## **WORK EXPERIENCE**

#### Softver

#### Fullstack web developer.

2020 - 2022

- Design and implement a clean and easy-to-use user interface for an ecommerce store as a front-end developer, prioritizing intuitive navigation and visual appeal.
- Manage the backend Stripe integration for secure and efficient payment processing.
- Use a headless CMS for streamlined content management, ensuring seamless updates and content scalability.

# Meditod 2023 - 2024

.net Backend Developer

- Develop and optimize secure, high-performance API endpoints for an ERP project, improving system efficiency and reliability.
- Lead the implementation of multiple backend modules, prioritizing security best practices and robust performance.
- Collaborate with cross-functional teams to ensure seamless integration and functionality across the ERP system.

## Insoltech

#### Frontend developer

2025

- I designed and implemented responsive and efficient user interfaces for a financial sector platform, improving user experience and accessibility.
- I optimized front-end performance following strict industry standards, contributing to increased system speed and stability.
- I collaborated with cross-functional teams in a confidential environment, ensuring consistent integration with critical systems and maintaining data integrity.
