About Me

I am a diligent fullstack developer with couple of experience in the field.
I am skilled in developing plans, managing projects, and user documentation.
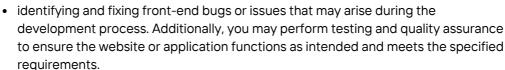

Work Experience

Intern frontend developer
Consigues Ventas, a perunian online sales funnel agency oriented to the development of digital strategies.
March 2020 to June 2020 (3 months)

- responsible for coding and building the user interface (UI) and user experience (UX) of the company's website or web application. This includes implementing designs provided by the design team, creating web pages, and ensuring they are visually appealing and functional.
- collaborate closely with the design team to understand their vision and translate their designs into functional web pages or application interfaces. This involves ensuring the design elements are implemented accurately and maintaining a consistent visual experience across the website or application.
- identifying and fixing front-end bugs or issues that may arise during the development process. Additionally, you may perform testing and quality assurance to ensure the website or application functions as intended and meets the specified requirements.

Freelance Web developer

June *2020 to Currently*

- Successfully completed various freelance projects for clients across diverse industries, delivering robust web solutions within defined timelines.
- Implemented responsive designs, optimized performance, and ensured cross-browser compatibility.
- Improved applications by 50% annually by consistently testing and refining software prior to rollout
- Released ad hoc product patches whenever necessary

Relevant Skills

- Javascript/typescript , C/C++, Python, Kotlin.
- Problem Solving
- Team Communication
